

Coleman® HVAC residential heat pumps

HH8 Side-Discharge Heat Pump

18+ SEER2
Variable speed

Premium performance and efficiency in a small footprint

Now you can get the performance and efficiency you've always wanted from one compact, side-discharge solution. This unit offers variable-speed operation and climate control for homeowners, as well as an easy-to-install solution for contractors. The choice is simple.

Benefits

- Side-discharge design and compact footprint for ducted systems
- Premium solution for hybrid system applications when paired with a gas furnace
- Optimized matches to meet eligibility requirements for most federal and regional tax credits, rebates and other incentives*

Grant
eligible

25% tax credit
eligible

- Premium, variable-capacity performance provides more consistent comfort
- Inverter-driven, variable speed provides consistent comfort
- Can be paired with existing non-Coleman® HVAC gas furnaces

* Contact your local Coleman® HVAC dealer and governing agencies for specific details.

HEATING AND
AIR CONDITIONING

NEW HH8 Heat Pump (3 Ton depicted)

- Up to **30%** smaller footprint than traditional equipment
- Sleek new paint color
- Innovative fan design for **low sound**
- Side-discharge design prevents snow, leaves and other debris entering the unit
- Compatible with **conventional 24V** thermostat
- Variable speed, inverter-driven compressor **modulates** speeds for consistent comfort.
- Available in **2-, 3- and 4 & 5-Ton** sizes
- Dual capacity switches on 4 & 5-Ton models minimize inventory
- Designed with **NEW R-454B low global warming potential (GWP)** refrigerant (scan QR code to learn more)
- All tonnages and matches are **optimized** for eligibility with most tax credits, rebates and other incentives*

Pro efficiency tips

- Heating with a heat pump can be up to 3x more efficient
- Use a primary heat source with an air handler in milder climates
- Pair with a gas furnace to make a 'hybrid system' for colder climates.
